

Healy Field Community Garden Petition

Community gardens serve many purposes and provide many community benefits: the opportunity to grow inexpensive fresh food, improved nutrition, recreation & exercise, social interaction, education, therapy, reduced family food budgets, increased neighborhood food security, neighborhood beautification, a sense of community, reduced crime and vandalism, constructive family time alternatives, and joy. We, the undersigned, are abutters and neighbors of Healy Field, in Roslindale, and strongly petition the City of Boston Parks and Recreation Department to authorize the creation of a community garden, on the grounds of Healy Field.
